Archiving Migration

The **Archiving Migration** program (`IMPFPAM`) allows you to convert archived information from SYSPRO 7 formats to SQL in SYSPRO 8, if not already done so during the initial conversion.

The archive data that can be converted from this program includes:

- ECC BOM archive data will be converted from XML to SQL
- WIP archive data will be converted from XML to SQL
- Sales order archive data will be converted from XML to SQL
- Lot archive data will be converted from ISAM to SQL

Understand and Explore

Where does it fit in?

When running the **Conversion of Databases to SYSPRO 8 Format** program, you are able to indicate if you wish to convert / migrate your archive data at a later stage.

This program allows you to complete the migration for that data.

Related programs

- **SYSPRO 8 Data Conversion**

Program access

- The **Archiving Migration** program (IMPPAM) must be run using the **Run SYSPRO Program** function within SYSPRO (CTRL + R).

Getting Started

Access control

Groups

Using the **Groups** program, an administrator needs to indicate which operator groups are required to have access to this program.

By default, access to this program is disabled for all operator groups other than the `ADMIN` group.

Prerequisites

The relevant archive files must be available on the server for these to be processed correctly:

- ECC BOM archives = XML document
- WIP archives = XML document
- Sales order archives = XML document
- Lot archives = ISAM file

Restrictions and limits

- Archive data will not be available in SYSPRO 8 until it has been converted using this program.

Deploy and Use

Processing time

The conversion of archive information to SQL can take a significant amount of time if there is a large amount of archived data.

Therefore, we recommend running this program once for each archive type.

User Interface

Toolbar and menu

Field	Description
Archiving Migration Type	Indicate which archive data you wish to migrate from your SYSPRO 7 database to SYSPRO 8.
Start Processing	Once you have indicated your file information, select this to start the migration process.

Archive Migration

Field	Description
File information	
File Selection	Indicate if you wish to migrate all files, or just a single file.
Single file name	If you selected Single in the File Selection field, please enter the file name here.

Reference Guides

SYSPRO's Reference Guides are primarily module-based and cover aspects of the user interface at program level. This includes detailed field and function explanations as well as notes and warnings regarding the usage of an application program within SYSPRO. These guides also extend to feature topics within the system (e.g. Tax, Security, Language Translation, etc.) and include implementation considerations. Please refer to the SYSPRO [InfoZone](http://infozone.syspro.com/support) for details on how to obtain these guides (<http://infozone.syspro.com/support>).

Support

SYSPRO's [InfoZone](#) provides up-to-date information about the product as well as more advanced tutorials for registered users.

Newsletter

As part of SYSPRO's ongoing commitment to keeping you informed about the latest product developments, a regular newsletter is distributed to the SYSPRO community. The newsletter covers many aspects of SYSPRO ranging from product enhancements to support-related information, known issues and useful tips. You can subscribe to this newsletter from the SYSPRO [InfoZone](#).

Forums

SYSPRO provides a number of active on-line [forums](#) for you to engage in various discussions about the product.
