Improved Balance Routines

Exploring

Where it fits in?

To optimize month-end and year-end processing, the **Balance** functions in the following modules have been created as separate business objects and are no longer automatically included in the month-end or year-end processing:

- Accounts Payable
- Accounts Receivable
- General Ledger
- Cash Book
- Asset Register
- Purchase Order
- Work in Progress

Previously, the balance function was always automatically performed in conjunction with the month/year end routines.

Benefits:

- Improve productivity with faster month-ends

Starting

Restrictions and Limits

- Although a warning is displayed if you run a month-end or year-end routine and the balance function has not yet been run, this message is not displayed for programs against which automation design has been applied.
