Toast Notifications

Toast Notifications

Exploring

Where it fits in?

Toast Notifications are notification windows displayed briefly on the screen to alert you of a condition, before disappearing automatically without requiring any operator input.

Starting

Security

Activities

You restrict operator access to *activities* within a program using the **Operator Maintenance** program.

Main menu - Allow to customize task dialogs

Controls whether an operator can customize task dialogs and show dialogs with single buttons as auto-expiring messages (i.e. toast notifications).

This must be enabled if you are not customizing at role level.

Solving

FAQs

How do I switch on Toast notifications?

1. From the **Setup Options** program load the **System-Wide Personalization** form (*Setup Options > System Setup > System-Wide Personalization*).

2. Switch on the **ENABLE TOAST NOTIFICATIONS** option.

Using

Hints and Tips

- Although toast notifications can't be customized in the traditional sense of the word, you can set a delay time to keep the notification displayed on screen and you can configure it to close once you start typing.

- If the message contains a colon character (:) it is treated as a data notification.

  You can view the last 20 data notifications by selecting the **Notification** icon from the SYSPRO Ribbon bar.
